component built here
origin
existing capability
geodesic pushers
metric reconstruction
level-capped deposition
adaptive mesh
excision, apparent horizons
constraint control
initial data, validation
coupled cycle
AthenaK
octree mesh and refinement
Z4c, moving-puncture gauge
particle container
matter-source coupling
apparent-horizon finder
Kokkos
performance portability
plasma particle-in-cell
implicit midpoint push
Boris rotation
cloud-in-cell, binomial filter
single-level deposition (WarpX)
relativity and mesh methods
tetrad form of gravity
lapse excision
parabolic constraint relaxation
Löhner refinement indicator
published references
NRPIC method paper (text)
exact reference solutions
